Taurus Introduces New Revolver in .327 Federal Magnum

January 2022 (Bainbridge, GA) – Taurus, manufacturer of premium handguns for defense, hunting, and sport shooting, is excited to announce that its most popular everyday carry revolver line is expanding with the introduction of a 6-shot model chambered for the .327 Federal Magnum.

The Taurus 856 has proven itself as a dependable, easy-to-carry personal protection handgun for anyone who favors the reliable performance and simplicity of a revolver. The revolver's compact design, smooth operation, and recoil-mitigating cushioned grip has made it a go-to firearm for everyday carry and deep concealment. Previously chambered only for .38 Special +P, Taurus now offers consumers a revolver based off the popular 856 but chambered for the highly capable .327 Federal Magnum.

The .327 Federal Magnum is one of the “dark horse” cartridges in the personal defense world. Based on a lengthened .32 H&R Magnum cartridge case, the .327 Federal Magnum exceeds the performance of its parent cartridge with velocity pushing toward the .357 Magnum range without the heavy perceived recoil pulse. This makes the .327 Federal Magnum-chambered Taurus an excellent choice for EDC revolver fans looking for a hard-hitting yet easily manageable 6-round capacity handgun in a compact and concealable form

The new Taurus 327 is a double-action/single-action, available as a 2-inch or 3-inch barrel firearm that is multi-cartridge compatible, able to also accept .32 H&R Magnum and .32 S&W Long cartridges. The matte black carbon steel or stainless-steel barrel, cylinder, and frame are backed by a recoil-absorbing rubber grip that is comfortable and provides excellent retention in a compact handgun platform. The Taurus 327's front serrated ramp sight and no-snap rear sight channel provide quick and clear targets acquisition supported by consistent accuracy.

- MSRP - \$371.05 Matte Black Model
- MSRP - \$388.32 Stainless Model

For more details on the new Taurus 327 or for more information on the complete Taurus line of personal defense, hunting, and competition handguns, visit [TaurusUSA.com](https://www.taurususa.com).

Taurus® Releases New Defender .357 Magnum Revolver

January 2022 (Bainbridge, GA) – Taurus®, manufacturer of premium handguns for defense, hunting, and sport shooting, introduces the all-new Defender for 2022. Based on the original revolver, Taurus engineers developed the Defender for personal defense practitioners who desire the solid performance and simplicity of a revolver.

Chambered for .357 Magnum/.38 Special, this 5-round revolver delivers the reliability and performance demanded in personal defense handgun with several mission-specific features included in this hammer-fired DA/SA platform.

The Defender starts with a clean barrel and frame profile for not only comfortable carry but also for smooth draw and re-holstering from IWB or OWB positions.

While the original 605 earned its chops as a deep-conceal snub nose, the new Defender features a longer, 3-inch barrel—making it short enough for deep concealed carry while delivering a sight radius for accuracy at distances beyond the personal space zone. The longer 3-inch barrel also delivers increased muzzle velocity (vs. 2-inch barrels) for more decisive terminal performance. Unlike most 3-inch barrel revolvers, the Defender 605 comes with an extended ejector rod for easier manipulation and quicker reloads.

That accuracy is further enhanced for low-light operation courtesy of the factory-installed tritium front night sight with an orange outline. The combination rear sight groove and front night sight ensures fast, clear sight acquisition across all light conditions.

The Defender comes in four different models, each featuring its own stylish and functional grip and finish combinations:

- Altamont wood grip with Tungsten Cerakote finish (MSRP \$517.33)
- Hogue rubber grip with matte black finish on a stainless steel frame (MSRP \$472.63)
- VZ black/gray grip with matte stainless steel and matte black cylinder finish (MSRP \$540.68)
- Hogue rubber grip with matte stainless steel finish (MSRP \$472.63)

As with all Taurus handguns, the Defender 605 comes with the Taurus Limited Lifetime Warranty and industry-leading customer service.

For more information on the all-new Taurus Defender 605 or to see the complete line of Taurus revolvers and pistols for personal defense, hunting, and competition, visit [TaurusUSA.com](https://www.taurususa.com).

Taurus® Announces the G3X Hybrid Compact Pistol

January 2022 (Bainbridge, GA) – Taurus, manufacturer of premium handguns for defense, hunting, and sport shooting, once again responds to consumer feedback. To better meet the comfort, performance, and carry style needs of its diverse consumer base, Taurus introduces the new G3X 9mm pistol.

The new Taurus G3X represents a design blend of two of Taurus' more recent semi-auto pistols—the G3 full-size 9mm and the G3C compact 9mm. In listening to consumer input on the company's popular G3 and G3C handguns, Taurus identified the need for a pistol that is both slim and easily concealed in the spirit of the Taurus G3C yet features higher capacity and a more substantial grip length for shooters with larger hands or who simply prefer a fuller grip without giving up EDC comfort or concealability.

The result is the new Taurus G3X in 9x19mm.

The Taurus G3X is built on a similar full-size frame as the G3, with a grip width of 1.1 inches and an overall height of 5.2 inches with the included 15-round magazine. This grip is an ergonomic and functional blend of size, backstrap contour, and aggressive stippling that provides the shooter uncompromised control and maximum retention under any shooting condition. The key difference is the overall length of the Taurus G3X. At 6.5 inches, the Taurus G3X is more than three-quarters of an inch shorter than the G3, putting it on par with the compact G3C model and offering a lower profile for concealed carry duty.

With its shorter length relative to the full-size Taurus G3, the new G3X is compatible with G3 and G3C T.O.R.O. slide kits. The latter is the perfect upgrade option (available through Taurus USA) for those who wish to install a red dot optic. The T.O.R.O. system features an optic cut with assorted mounting plates that are compatible with common aftermarket electro-optics. Also, the Taurus G3X comes with a dovetail cut for the rear sight, allowing consumers to install popular aftermarket tritium night sights for enhanced low light performance.

Taurus G3X Specifications

- **Caliber:** 9mm Luger
- **Capacity:** 2x15 (compatible with Taurus G3 17 rounds magazines)
- **Firing System:** striker
- **Action Type:** single action only with restrike capability

Taurus Introduces the TX22 Competition “Steel Challenge Ready” Rimfire

December 2021 (Bainbridge, GA) – Taurus, manufacturer of premium handguns for defense, hunting, and sport shooting, expands the groundbreaking TX22 lineup with the introduction of the most factory-ready Target handgun ever—the TX22 Competition SCR.

The TX22 Competition SCR is the next iteration of Taurus’ standout .22LR semi-auto. This is the full-size rimfire that captured the *Guns & Ammo* Handgun of the Year award for its exceptional design, reliable performance, diverse applications, and surprisingly low price point. In 2021, Taurus revisited the TX22 platform with a competition-focused version that introduced a new slide and barrel configuration to accommodate red dot optics and to improve balance for faster sight reacquisition.

Now, Taurus moves the TX22 platform to the next level with the TX22 Competition SCR (Steel Challenge Ready).

The TX22 Competition SCR builds on the original TX22 Competition model with its precision engineered slide and match-grade bull barrel. The “skeletonized” slide with enlarged ejection port is designed so that a red dot optic can be mounted to the barrel and to help prevent any issue during ejection of empty shells. This mounting configuration significantly enhances accuracy compared to a slide-mounted optic platform. Two adapter plates each featuring two mounting patterns are included to interface the leading red dot sights on the market today with the barrel.

Two additional factory upgrades elevate the TX22 Competition SCR’s performance credentials. The first is the TANDEMKROSS Game Changer Pro Squared Compensator. This included compensator features dual 45-degree-angle gas venting to counter muzzle rise and recoil for quicker follow-up shots. Furthermore, this compensator helps improve overall gun balance that, combined with the muzzle rise and recoil mitigation, keeps the gun “in the zone” for lightning quick sight re-acquisition in fast-paced competition environments.

Another upgrade found exclusively on the TX22 Competition SCR is a TANDEMKROSS Eagle’s Talon extractor. This custom extractor’s precision-machined out of tool steel, positive hook provides a reliable “grab” on the cartridge rim to reduce and eliminate failure-to-eject malfunctions during high-volume cycling.

Both these factory upgrades, combined with the TX22 Competition SCR’s high-polish custom feed ramp, target trigger system, and unparalleled ergonomics for a full-size, polymer frame platform, deliver a semi-auto rimfire that is ready for pulse-pounding competitive matches right out of the box. And with an MSRP of \$589.32, the TX22 Competition SCR is certainly the class leader in the price-to-performance arena.

SKU: 1-TX22C151-T10 (10 round magazine item number)

SKU: 1-TX22C151-T (16 round magazine item number)

Heritage™ Expands Barkeep™ Revolver Line

Heritage™ Manufacturing, Inc., producer of the classic-style Rough Rider® single-action revolvers, takes “compact” to a new level with the introduction of the new Barkeep™ Boot series revolvers.

The Barkeep Boot is a downsized version of the recently introduced Barkeep revolver—a single-action rimfire based on the company’s popular Rough Rider series handguns available in two- or three-inch barrel lengths. In the spirit of the Old West, this new revolver from Heritage Mfg. moves the Barkeep from “waistcoat carry” to “boot carry” with its diminutive one-inch barrel and sleek bird’s head grip profile.

Chambered for .22 LR (will accept the Heritage .22 WMR cylinder), the Barkeep Boot comes with a new 1-inch barrel for optimal discreet carry in a revolver. Adding to the Barkeep Boot’s easy-carry nature is an elegant bird’s head-style grip, which offers a comfortable hold and a flowing aesthetic profile with less bulk when compared to the traditional “plow handle” grip.

Beyond the barrel length and grip, the Barkeep Boot delivers the familiar operation and quality construction of the Rough Rider series single-action revolvers on which it is based. This includes a hammer firing system, manual safety, classical notched rear sight, and black oxide barrel, frame, and cylinder finish.

Three models are offered with custom wood black grips, custom gray pearl grips, and custom-engraved wood grips. All revolvers come with a custom Heritage wood-handled ejector rod for removing empty cartridge cases.

For more information on the new Barkeep Boot or to see the full line of exciting small-bore single-action revolvers and specialty firearms in the Rough Rider and Barkeep lineups, visit HeritageMfg.com.

About Heritage:

Heritage Manufacturing, Inc. proudly produces western-style revolvers in the Small- and Big-Bore Rough Rider Series. These time-tested, traditional western firearms are made affordable in .22 LR and .22 Magnum. No Heritage Rough Rider Revolver is manufactured without outstanding craftsmanship, accuracy, and quality as the cornerstone. Learn more at <http://heritagemfg.com/>.

Heritage Introduces the Rough Rider “Tactical Cowboy” Revolver

Heritage Manufacturing, Inc., producer of the classic-style Rough Rider series single-action revolvers, is excited to announce the latest iteration in its growing lineup of innovative handguns—the Rough Rider TC, or “Tactical Cowboy.”

As the name implies, the Rough Rider TC ingeniously blends traditional Old West single-action revolver styling with a nod to contemporary performance.

Based on the popular 6.5-inch barrel .22 LR six-shooter, the Rough Rider TC offers enhanced sighting options and muzzle configurations, allowing shooters to enjoy the classic feel and balanced handling of an SA revolver while benefitting from modern shooting accessories like fiber-optic open sights, red dot sight, and custom muzzle devices.

The Rough Rider TC features a Picatinny rail atop the frame, providing a solid mounting solution for the addition of a red dot-style optic. Also included is an elevated front sight with a fiber optic element for open sight shooting and optimal visibility in all lighting conditions. Rear sight alignment comes courtesy of the notched Picatinny rail, allowing the Rough Rider TC to be used with either open or red dot sights.

To compliment the high-tech spin of this Old West favorite, the Rough Rider TC comes with stylish carbon fiber simulated grips. These, of course, can be customized with any of the many classic-style grip panels available through the Heritage online store. Finally, the muzzle is threaded ½ inch – 28 RH for use with a suppressor or muzzle device and includes a thread protector.

Heritage Mfg. Rough Rider TC Specifications

Caliber: .22 LR

Capacity: 6 rounds

Action: SAO

Barrel Length: 6.5 in.

Safety: manual

Overall Length: 11.85 in.

Overall Height: 5.1 in.

Overall Width: 1.5 in.

Weight: 32.1 oz.

Special Features: Picatinny rail, threaded barrel, fiber-optic front sight, rear sight notch on Picatinny rail, carbon fiber simulated grips

MSRP: \$212.88

For more information on the new Heritage Mfg. Rough Rider TC or any of the company’s single-action small-bore revolvers and accessories, visit HeritageMfg.com.

About Heritage:

Heritage Manufacturing, Inc. proudly produces western-style revolvers in the Small- and Big-Bore Rough Rider Series. These time-tested, traditional western firearms are made affordable in .22 LR and .22 Magnum.
